Dear Hiring Manager,

As a Master of Computer Science graduate with hands-on experience in software development, I am eager to apply for the Java Full Stack Web Application Developer position at LBi Software. My academic projects and professional experience have honed my skills in Java, REST Services, React, Unit Testing, Continuous Integration, and Agile Methodologies.

During my time at Freshgravity, I developed a user interface using Python and Flask while adhering to agile practices, achieving a 30% improvement in database performance. Additionally, my project, *SecurePay Transaction System*, involved building secure transaction APIs using Java and Spring Boot, showcasing my ability to design scalable and secure solutions for real-world applications. Currently, I am enhancing my skillset by learning Hibernate to deepen my expertise in Java-based frameworks, further strengthening my capabilities as a full-stack developer.

I am confident that my technical skills, proactive learning mindset, and commitment to delivering high-quality software solutions will enable me to contribute effectively to LBi Software's projects and goals.

Thank you for considering my application. I look forward to the opportunity to bring my skills to your team and contribute to your success.

Sincerely,
Archit Gupta
